

RING SIZE GUIDE

Measuring a ring you already own

FIRST — CHECK YOUR PRINT SCALE

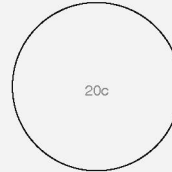

Print this guide on A4 at 100% ("Actual size"), with "Fit to page" or "Scale to fit" switched off. Then check one of the references below. If they match, every measurement in this guide is accurate.

85.6 mm — the long side of any credit or bank card

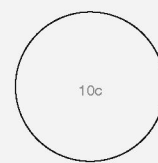

Lay a card along the line. The ends should meet exactly.

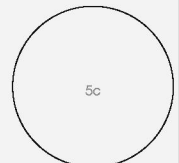

No card? Match a euro coin.

HOW TO USE THE CIRCLES

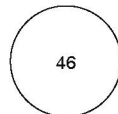

1. Choose a ring that already fits the finger you have in mind — ideally one of a similar width.
2. Lay it flat on the circles below and work down the sizes until you find the match.
3. The right size is the one where the printed circle sits exactly inside the band, with no gap and no overlap.
4. Between two sizes? Take the larger one.
